- Deep Learning

Personal Projects

Real-Time Chat App / *JavaScript, React, Node.js, Express.js, MongoDB, Socket.IO* 2025

- Built a secure real-time chat app for fast internal communication.
- Used Socket.IO for live messaging, online status updates, and instant data sync.
- Added iOS-style notification sounds for better message feedback.
- Built the frontend with React.js and Daisy UI, giving users a clean page to send and receive messages.
- Built REST APIs with Node.js and Express; used MongoDB for scalable data storage.

Personalised AI Course Generator / *Next.js, Drizzle ORM, Neon PostgreSQL, Gemini API, Shadcn UI, Clerk SDK, Youtube API* 2026

- Built a full-stack web app that creates a personalised learning course based on user inputs like topic, difficulty, and duration.
- Used the Gemini API to auto-generate course outlines, chapters, explanations, and code examples.
- Handled authentication using Clerk SDK.
- Built the frontend with Next.js and Shadcn UI, providing a dashboard to create and browse courses.
- Handled backend logic with Next.js server routes and Drizzle ORM; stored all data in a Neon PostgreSQL database.
